

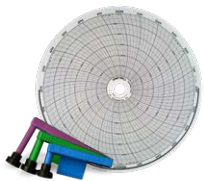

Graphic Controls offers a comprehensive range of date recording and monitoring products for climate-sensitive goods. With over a century of market leadership, we ensure optimal temperature and humidity monitoring in your production environment with our analog chart papers and marking pens. For transit, our TrekTag data loggers track temperature, humidity, and light exposure. Additionally, we supply thermal transfer ribbons for printing directly on product packaging. Trust us as your all-inclusive provider for manufacturing environments. Contact your Sales representative today at info@graphiccontrols.com.
